# SPI

## Single-Point Injector

Brings additive-enhanced, precision-blended fuel to the end of your fueling hose.

IDEAL for...

Treatment of fuel at remote locations with questionable fuel quality

# Fluid power

Flow of the Fuel powers the Injector.  
**NO OUTSIDE POWER SOURCE NECESSARY**

NOW YOU CAN...  
**CUSTOM-BLEND**  
Your Aircraft Fuel

## STANDARD FEATURES

- Single-point nozzle with On/Off valve
- Single-point receptacle for connection to fuel hoses
- Adjustable positive displacement injection pump
- On/Off valve
- Estimated weight: 39 lbs. (Model 300)
- Pelican® case with room for hoses, accessories and additional desiccant dryers

## EQUIPMENT OPTIONS

- Remote additive feed with dry-break connections
- 5 SF adapter for connection to 5-gallon additive containers, 3/4" MNPT threads
- Over-wing inlet adapter available for use with standard over-wing nozzle

## LIGHTWEIGHT

Quick and Easy to use!

The **SPI Single-Point Injector** brings precision blended fuel to the end of your fueling hose, anywhere, anytime. Originally developed for our military, this **suitcase-sized portable device** can be connected to any aircraft with a standard single-point fueling receptacle providing the **same accurate, automatic blending** of additives as permanently installed truck and cabinet systems. Additives such as **Biobor® JF** or **Prist®** require continuous injection and complete blending in order to achieve maximum benefits. The SPI uses the **same proven fluid-powered technology** as our famous Model 600 refueler-mounted injectors. When additive is required, the injector is attached to the aircraft and the fueling hose attached to the injector inlet. **Injection is automatic** as fuel passes through the injector's fluid-powered motor. **Aircraft, helicopters, military** or **practically any user** can now custom-blend their fuel in order to insure complete dispersion of **biocides (Biobor® JF)**, **icing inhibitor (Prist®)** and **thermal stability additives +100 (TurboLine®)** with a totally portable, lightweight unit.

INNOVATION—pure and simple

6807 West Little York Road • Houston, Texas 77040 • (800) 582-4224

## Single-Point Injector

Convenient and Easily Transportable

Includes  
**Pelican®** Case  
for easy and  
secure storage

Over **11,000** Systems Installed  
—WORLDWIDE—

# BIOBOR® JF

KEEPS FUEL FREE FROM MICROBIAL GROWTH

For a safe and sterile fuel supply  
Hammonds recommends

## Biobor® JF BIOCIDE MANAGEMENT

made easy with  
Biobor® JF and an SPI Injector

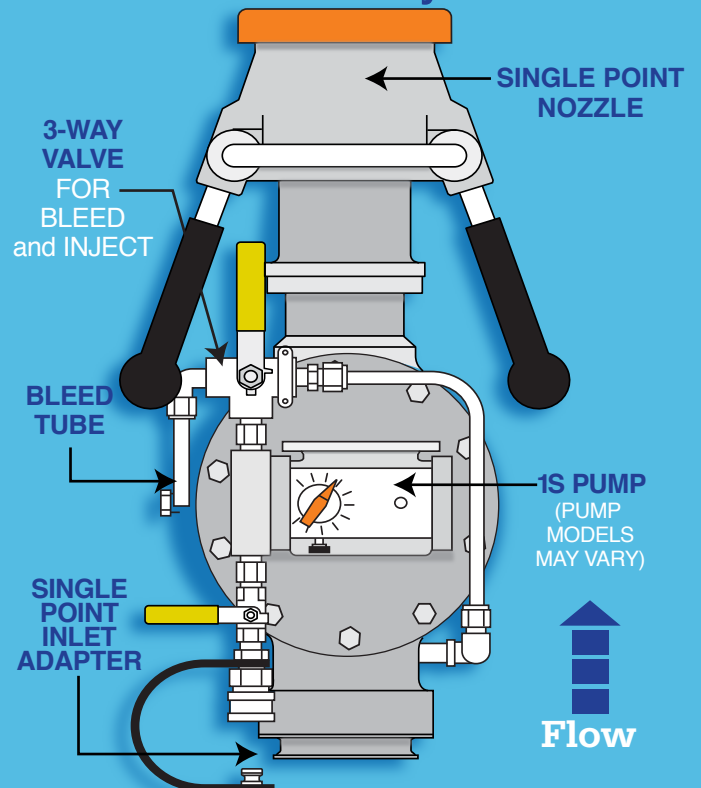

- **Precision** additive pump
- **Accurate, automatic** additive blending
- **Lightweight**, easy to use
- Installs in **minutes**
- **Pelican®** suitcase for easy transport
- Fits **any** single-point fueling receptacle
- Requires **no outside power source**
